[Training in the Motor Vehicle Repair and Sales Sector in the Netherlands](#) Sep 29 2022 Training in the motor vehicle repair and sales sector in the Netherlands was examined in a study that included the following approaches: review of the sector's structure/characteristics, institutional and social context, employment practices, changing conditions, and available education and training; in-depth case studies of four auto repair shops and dealerships (two small, one medium-sized, and one large firm); and identification of economic, employment, and training trends. It was discovered that, in response to stagnation of the Dutch motor vehicle sales and repair industry in the 1990s, both the Dutch government and the industry have increased their commitment to vocational training and inservice courses and have created a training infrastructure that compares favorably with those of other sectors in the Dutch economy. All four businesses studied in depth were managed by individuals who were very involved in training, had access to good facilities and opportunities for on-the-job teaching/training, and could avoid themselves of good external provisions for inservice training. Quality of service was an important element of training philosophy. Training needs were not always analyzed in a very structured way, and none of the businesses studied evaluated systematically the costs/benefits of training. Contains 20 references and 19 tables/figures. (MN)

Driver Tips Feb 08 2021 Have you ever gone to a mechanic shop for a basic service like an oil change and came out with a long list of recommendations? Whom can you believe? It is almost like going to a French restaurant and not understanding the menu. This book is not only to translate the menu, but also to help you with the selections and to help prevent surprises. Times change and now more than ever dependable transportation is one of the main necessities of life. Luxury is far from a priority. With this guide of repair options, you will become an expert on shopping for services. Prioritize repairs or preventive maintenance to keep a balance from a healthy transportation to a happy wallet. It is nice to know that you do not have to agree with the mechanic all the time, we (mechanics) can be wrong just like your doctor and believe to be right. This is not a do it yourself book. It is a dictionary for car services and help to teach whom to trust in this contaminated car industry. Keep it in the glove compartment and have a mechanic on your side all the time.
