Corporate Performance and Managerial Ties in China Dec 26 2019 In many countries, business practitioners, policy makers, pundits and laypeople want to know how strong China really is in business. In the preceding century, the overall tone of business comments on China was filled with fanfare and ovation. However, despite economic performance and seemingly inexorable growth, some global data in areas such as labour productivity and digital competitiveness, show a different and more nuanced picture. This collection provides a multi-level reality check on the Chinese economy, firm performance and managerial ties. Given that China must transform its economy and business that can pull global talent together to produce high-end technologies for radically innovative products and services, this book proposes two questions. First, can China restructure its economy from a low-cost growth model to a high value-added innovative model without incurring major structural inertia? Second, can Chinese firms outperform competitors in global high value markets without relying on state initiatives, central funding mechanisms and public R&D institutions? This book was originally published as a special issue of the journal, Asia Pacific Business Review.

Understanding a Changing China Aug 14 2021 As China becomes the world's largest economy, so it becomes important to understand the key issues shaping the country's business environment and the behaviour of Chinese businesspeople. This is difficult because those issues are contested. Is China growing at 3% or 8%? Is the Chinese consumer going to save the world? Are state-owned enterprises national champions or zombies? Have we reached the end of "Cheap China"? Can China innovate? Is business still dominated by personal connections? Are markets or the state in control? Does Chinese culture impede or support organizational effectiveness? Are Chinese dragons at your

door? Will the finance and property sectors implode? Is the Chinese model sustainable, or will it end in tears? On all these issues there is ill-informed "noise", and an abundance of partisan interpretations. The purpose of this book, therefore, is to provide an even-handed analysis of the key issues that will shape the threats and opportunities arising from China's development in the next decade. It cannot resolve the competing claims made. However, it does provide the reader with the ideas and the sources of evidence needed to understand and to make well thought-out judgments as China continues to evolve.

Ancient Chinese Thought, Modern Chinese Power Aug 02 2020 The rise of China could be the most important political development of the twenty-first century. What will China look like in the future? What should it look like? And what will China's rise mean for the rest of world? This book, written by China's most influential foreign policy thinker, sets out a vision for the coming decades from China's point of view. In the West, Yan Xuetong is often regarded as a hawkish policy advisor and enemy of liberal internationalists. But a very different picture emerges from this book, as Yan examines the lessons of ancient Chinese political thought for the future of China and the development of a "Beijing consensus" in international relations. Yan, it becomes clear, is neither a communist who believes that economic might is the key to national power, nor a neoconservative who believes that China should rely on military might to get its way. Rather, Yan argues, political leadership is the key to national power, and morality is an essential part of political leadership. Economic and military might are important components of national power, but they are secondary to political leaders who act in accordance with moral norms, and the same holds true in determining the hierarchy of the global order. Providing new insights into the thinking of one of China's leading foreign policy figures, this book will be essential reading for anyone interested in China's rise or in international relations. In a new preface, Yan reflects on his arguments in light of recent developments in Chinese foreign policy, including the selection of a new leader in 2012.

China's Offensive in Europe Jun 19 2019 A portrait of China's new economic passion toward Europe. For years China's international investment interests focused on a search for natural resources in Africa, Asia, and Latin America. Recently China's focus has shifted to Europe as well as the United States, and to new fields as diverse as real estate, energy, hospitality, transportation, and heavy industry. Chinese foreign investment is expected to grow throughout Europe in the years to come. For instance, the financial crisis centered in Greece and the fall of the euro have helped China and some of its corporations create a new partnership within the European Union, working to expand the country's power through finance and infrastructure. China's Offensive in Europe studies the trends, sectors, and target countries of Chinese investments in Europe. It looks at cases of outbound investment trajectories and journeys by some key Chinese private and state-owned companies. It also takes a look at European perceptions of China, a country with a very different history and very different traditions from the Western world. Philippe Le Corre and Alain Sepulchre examine how China's presence in Europe can serve as a benchmark to other developed economies—especially the United States, which is also seeing a rise in Chinese investments.

Redefining A Philosophy for World Governance Jul 21 2019 This Key Concepts pivot discusses the contemporary relevance of the ancient Chinese concept of Tianxia or 'All-Under-Heaven' and argues the case for a new global political philosophy. 'All-under-heaven' is a conceptualization of the world as the composition of three realms: the physical, psychological and political, which places inclusivity and harmony at the heart of a global world view above other considerations, transcending the notion of nation state. In a highly interconnected and globalized world, the idea of Tianxia can offer a new 21st century vision of international relations and world order, based on a harmonized global organization defined by the "all-inclusiveness principle." Promoting the ontology of co-existence and relational rationality hand in hand with rational risk aversion in a globalized world, this pivot makes the case that Tianxia could offer a new vision for contemporary world order, redefining the universality and legitimacy of politics.

Redefining Chinese Literature and Art Sep 22 2019 This Key Concepts pivot discusses the significance of the ancient Chinese concept of xing or 'Association' in defining Chinese civilization and thought through the centuries. Death by China Feb 26 2020 The world's most populous nation and soon-to-be largest economy is rapidly turning into the planet's most efficient assassin. Unscrupulous Chinese entrepreneurs are flooding world markets with lethal products. China's perverse form of capitalism combines illegal mercantilist and protectionist weapons to pick off American industries, job by job. China's emboldened military is racing towards head-on confrontation with the U.S. Meanwhile, America's executives, politicians, and even academics remain silent about the looming threat. Now, best-selling author and noted economist Peter Navarro meticulously exposes every form of "Death by China," drawing on the latest trends and events to show a relationship spiraling out of control. Death by China reveals how thousands of Chinese cyber dissidents are being imprisoned in "Google Gulags"; how Chinese hackers are escalating coordinated cyberattacks on U.S. defense and America's key businesses; how China's undervalued currency is damaging the U.S., Europe, and the global recovery; why American companies are discovering that the risks of operating in China are even worse than they imagined; how China is promoting nuclear proliferation in its pursuit of oil; and how the media distorts the China story—including a "Hall of Shame" of America's worst China apologists. This book doesn't just catalogue China's abuses: It presents a call to action and a survival guide for a critical juncture in America's history—and the world's.

Harmonism as an Alternative May 31 2020 This Key Concepts pivot considers the fundamental Chinese cultural ideal of harmony (hé?). Historically originating from Confucianism, the concept of harmony sits at the heart of Chinese traditional culture, which is characteristically morality-based and harmony-conscious due to the central role of pragmatic reason and wisdom nurtured through Confucianism, Daoism, Mohism, Legalism and other schools of thought. This pivot delineates the rationale of the Chinese philosophy of harmony and its implications for modern social practices worldwide. It notably reexamines the relevance of hé beyond the realm of philosophy, and how this concept can impact on modern day human relations, amongst individuals and families as well as on a wider societal scale. It explores how hé can affect perspectives on political interaction, international relations and human conflict, as well as the interaction between man and nature. Addressing the inevitable tension between theory and practice, this book argues for the very real relevance of hé in 21st century cultural, social, political and economic spheres in China and beyond.
