The Era of the Martyrs Feb 26 2020 One of the most traumatic experiences of Late Antique Christians was the Great Persecution, begun by Emperor Diocletian and his Tetrarchic colleagues in 303 CE. Here Aaltje Hidding

unites research of traditional memory studies with work done by cognitive scientists to examine how they remembered the Persecution. The resulting methodological framework, the 'cognitive ecology', systemically studies all what can be covered by this term - social surroundings, cognitive artefacts and the physical environment - and bridges the gap between individual and collective memory. The author analyses the remembrance of the Persecution in three different regions along the Nile river. In Oxyrhynchus, the thousands of papyrus fragments found at the city's rubbish dump give a vivid image of the martyrs in the daily lives of the Oxyrhynchites. In Antinoopolis, known for the cult of the physician saint Colluthus, she zooms in on the rituals and practices at a martyr's sanctuary. Finally, in Dandara, the rich hagiographical dossier of the anchorite Paphnutius shows how old memories of the Persecution became mixed with new monastic experiences. The Bohairic and Greek Passion of Paphnutius appear in their first complete English translations.

Computational Science and Its

Applications - ICCSA 2004 Aug 02 2020 The natural mission of Computational Science is to tackle all sorts of human problems and to work out intelligent automata aimed at alleviating the burden of working out suitable tools for solving complex problems. For this reason Computational Science, though originating from the need to solve the most challenging problems in science and engineering (computational science is the key player in the fight to gain fundamental advances in astronomy, biology, chemistry, environmental science, physics and several other scientific and engineering disciplines) is increasingly turning its attention to all fields of human activity. In all activities, in fact, intensive computation, information

handling, knowledge synthesis, the use of ad-hoc devices, etc. increasingly need to be exploited and coordinated regardless of the location of both the users and the (various and heterogeneous) computing platforms. As a result the key to understanding the explosive growth of this discipline lies in two adjectives that more and more appropriately refer to Computational Science and its applications: interoperable and ubiquitous. Numerous examples of ubiquitous and interoperable tools and applications are given in the present four LNCS volumes containing the contributions delivered at the 2004 International Conference on Computational Science and its Applications (ICCSA 2004) held in Assisi, Italy, May 14-17, 2004.

New Approaches to Teaching Italian Language and Culture Mar 21 2022 New Approaches to Teaching Italian Language and Culture fills a major gap in existing scholarship and textbooks devoted to the teaching of Italian language and culture. A much-needed project in Italianistica, this collection of essays offers case studies that provide a coherent and organized overview of contemporary Italian pedagogy, incorporating the expertise of scholars in the field of language methodology and language acquisition from Italy and four major countries

where the study of Italian has a long tradition: Australia, Canada, Great Britain and the United States. The twenty four essays, divided into six main parts, offer a tremendous variety of up-to-date approaches to the teaching of Italian as a foreign language and L2, ranging from theoretical to more practical, hands-on strategies with essays on curricular innovations, technology, study abroad programs, culture, film and song use as effective pedagogical tools. Each case study introduces a systematic approach with an overview of theory, activities and assessment suggestions, collection of research data and syllabi. The book addresses the needs of instructors and teacher trainers, putting in perspective different examples that can be used for more effective teaching techniques according to the ACTFL guidelines and the Common European Framework of Reference for Languages.

Basic Italian for English Speakers Dec 18 2021 The aim of the book is to teach basic Italian in fifteen lessons. Readers will learn the language by building sentences and phrases as they proceed through the lessons. Italian grammar is quite complicated so grammar

rules have been simplified where possible and are used in exercises, comprehension and even games so that the reader can practice immediately and in a fun way. Explanations begin in English, but as the book progresses, the English language is gradually phased out and Italian is used primarily to explain and elaborate. This is not meant to be an exhaustive Italian grammar book. Its objective is to present basic Italian in an easily understandable way for English-speaking people who may want to holiday, spend longer periods, or even decide to set up home in this truly beautiful country.

Fondamenti Di Psicologia Dello Sviluppo

Sep 03 2020 Lo scopo della psicologia dello sviluppo è descrivere e spiegare i cambiamenti nel comportamento e nelle attività psicologiche dal periodo prenatale fino alla vecchiaia. Il volume affronta in modo approfondito i principali temi della psicologia dello sviluppo dal periodo prenatale fino alla vecchiaia, esaminandone sia gli aspetti biologici che quelli culturali. Nel testo sono presentate le più importanti teorie dello sviluppo in una prospettiva storica e, in particolare, quelle di Piaget, Vygotskij e Bowlby, che permettono di comprendere gli orientamenti della ricerca contemporanea e forniscono una sintesi moderna rispetto alle radicali posizioni innatiste e ambientaliste. Il testo presenta

inoltre recenti ipotesi, sostenute da evidenze sperimentali, che hanno portato a parziali revisioni di queste teorie. Il volume fornisce in tal modo una visione complessiva e aggiornata delle questioni teoriche e metodologiche più rilevanti della psicologia dello sviluppo ed è consigliato per studenti universitari, insegnanti, operatori del settore, genitori e per tutti coloro che sono interessati a questa disciplina. Il curatore di questa edizione ha inoltre apportato integrazioni e adattamenti specifici per il pubblico italiano. A tal fine, sono state anche illustrate recenti ricerche italiane rilevanti per i temi trattati nel testo.

Innovation in Methodology and Practice in Language Learning Mar 09 2021 This volume is composed of 24 papers originally presented as talks at the VIII National Conference of the

Italian Association of University Language Centres (Associazione Italiana dei Centri Linguistici Universitari: AICLU), held at the University of Foggia, Italy, between 30 May and 1st June 2013. The contributions fall into five sections: 1) keynote addresses from plenary speakers; 2) innovative challenges for language centres; 3) new developments in teaching language for specific purposes; 4) proposals and case studies in Content and Language Integrated Learning; and 5) the use of new technologies in language learning. 18 papers are in English, four in Italian, one in French and one in German. The fact that three-quarters of the papers are in English reflects the way English has become the lingua franca of academic conferences today. However, in keeping with the ethos of CercleS (Confédération Européenne des Centres de Langues de l'Enseignement Supérieur, the pan-European organisation to which AICLU belongs), which is strongly committed to promoting plurilingualism, it was crucial that contributions would also be accepted in other languages. The volume represents the 'state of the art' in the field of language teaching and theory in university language centres not only in Italy, but also in other parts of Europe and the Mediterranean, and testifies to the rich variety of ways in which these centres are adapting and thriving in rapidly changing times.

Creative Interventions Sep 22 2019 Who are "intellectuals"? What do they think their role

and function in contemporary society is? Are they on the endangered-species list? Is equating conservatism with conservation becoming their dominant survival strategy? This book is a collection of essays that examines some of the changes in the activities, role, function and self-perception of Italian intellectuals since World War II (two major divides are considered to be the crisis of 1956-7 and the fall of the Berlin Wall). The first section examines some of the most influential figures in the early decades, the second the activities of contemporary intellectuals, a third gives voice to some contemporary writers, a fourth contains some comparative essays about the role of intellectuals in influential contemporary Western cultures and a final section is devoted to some cross-disciplinary forays and reflections on the relevance and possible future directions of these inquiries.
