Babel Unbound Apr 29 2020 In this timely, original and sophisticated collection, writers from the Global South demonstrate that forms of publicness are multiple, mobile and varied. The notion that societies mediate issues through certain kinds of engagement is at the heart of imaginings of democracy and often centers on the ideal of the public sphere. But this imagined foundation of how we live collectively appears to have suffered a dramatic collapse across the world, with many

democracies apparently unable to solve problems through talk – or even to agree on who speaks, in what ways and where. In the 10 essays in this timely, original and sophisticated collection, writers from southern Africa combine theoretical analysis with the examination of historical cases and contemporary developments to demonstrate that forms of publicness are multiple, mobile and varied. They propose new concepts and methodologies to analyse how public engagements work in society. *Babel Unbound* examines charged examples from the Global South, such as the centuries old Timbuktu archive, Nelson Mandela as a powerful absent presence in 1960s public life, and the challenges to the terms of contemporary debate around the student activism of #rhodesmustfall and #feesmustfall. These show how issues of public discussion span both archive and media, verbal debates in formal spaces and visual performances that circulate in unpredictable ways.

Becoming Europe Jun 19 2019 “We’re becoming like Europe.” This expression captures many Americans’ sense that something has changed in American economic life since the Great Recession’s onset in 2008: that an economy once characterized by commitments to economic liberty, rule of law, limited

government, and personal responsibility has drifted in a distinctly “European” direction. Americans see, across the Atlantic, European economies faltering under enormous debt; overburdened welfare states; governments controlling close to fifty percent of the economy; high taxation; heavily regulated labor markets; aging populations; and large numbers of public-sector workers. They also see a European political class seemingly unable—and, in some cases, unwilling—to implement economic reform, and seemingly more concerned with preserving its own privileges. Looking at their own society, Americans are increasingly asking themselves: “Is this our future?” In *Becoming Europe*, Samuel Gregg examines economic culture—the values and institutions that inform our economic priorities—to explain how European economic life has drifted in the direction of what Alexis de Tocqueville called “soft despotism,” and the ways in which similar trends are manifesting themselves in the United States. America, Gregg argues, is not yet Europe; the good news is that economic decline need not be its future. The path to recovery lies in the distinctiveness of American economic culture. Yet there are ominous signs that some of the cultural foundations of America’s historically unparalleled economic success are being corroded in ways that are not easily reversible—and the European experience should serve as the proverbial canary in the coal mine.

Progress of the World's Women 2015-2016 Sep 03 2020 This UN Women's flagship report shows that, all too often, women's economic and social rights are held back, because they are forced to fit into a 'man's world'. But, it is possible to move beyond the status quo, to picture a world where economies are built with women's rights at their heart. It is being published as the

international community comes together to define a transformative post-2015 development agenda, and coincides with the 20th anniversary commemoration of the landmark Fourth World Conference on Women in Beijing, China which set out a comprehensive agenda to advance gender equality. This publication brings together human rights and economic policymaking, and provides the key elements for a far-reaching new policy agenda that can transform economies and make women's rights a reality. Through solid in-depth analysis and data, this evidence-based report provides key recommendations on moving towards an economy that truly works for women, for the benefit of all.

Complex Sport Analytics Dec 26 2019 This book is the first to combine principles from analytics, complex systems theory, multi-disciplinary diagnostics and sport performance analysis. It considers athletes, teams, and sport organizations in individual and team games as complex systems, and demonstrates how complexity studies can enrich analytics and give us a more sophisticated understanding of the causalities of winning and losing in sports. Part I introduces the basic categories of analytics and their uses in elite sport. Part II presents an original conception of sport analytics both as a complex of different kinds of processes and as a complexity-adapted view of human systems acting in sport performance and management. Part III considers the main principles of complex sport analytics, expanding the prism of complexity to include all levels of a sport organization from athletes, coaches and trainers to top decision makers, and suggests practical applications and simulations for cases of both individual and team sports. This is illuminating reading for any advanced student, researcher or practitioner working in sport analytics, performance analysis, coaching science or sport management.

Challenges to European Welfare Systems Aug 02 2020 This book provides the first comprehensive analyses of the challenges all European welfare systems have been facing since 2007, combining in-depth country-based studies and comparative chapters. It focuses on: 1) the economic and financial crisis, 2) demographic change, and 3) the balance between avoiding risks and opening up opportunities in social policy. The results show that European welfare systems tend to face the same challenges in different ways and that also their responses to those challenges differ considerably. Although the EU also plays a part in shaping national welfare systems, it becomes evident that European

welfare systems are by no means converging: in terms of social policy, national diversity within Europe is still a major factor that will shape future developments in European welfare systems.

Rise and Decline and Rise of China Jul 01 2020 Running like a red thread through this book are the manifestations of Sino-African relations dating back many centuries. In this way, The Rise and Decline and Rise of China: Searching for an Organising Philosophy takes forward the work MISTRA conducted on the Mapungubwe society, one of the advanced states that existed in southern Africa some 800 years ago. What makes this research report unique, though, is that the treatment of these issues has been undertaken primarily from an African perspective.
